

# HP4 Mono FLEX

*Small but powerful, high capacity, 220/380V mono/three phase, user friendly mortar pump!*

**Large mixer with 45lt volume, material filling up to 2 bags, cutter grid, wear resistant vessel**

**High efficiency 220 / 380V electric motor - gearbox group**

**Homogeneous fluidization and optimum material output with wide, conical mixing-delivery tube made of wear-resistant metal**

**Selectable Worm Pump according to the application**

**Strong Control Panel** built of best quality, world class electro-

GYPSUM / FINE PLASTERING

- **Exterior Plastering**  
(Lime, Lime Cement and Gypsum Insulation Mortars)
- **Interior Plastering**  
(Lime Cement, Gypsum Mortars)

MORE APPLICATIONS

- Self Levelling / Liquid Screed
- Wall, Bonding, Restoration Mortars
- Injection Mortars

**BEST PRICE & PERFORMANCE  
PLASTER PUMP**

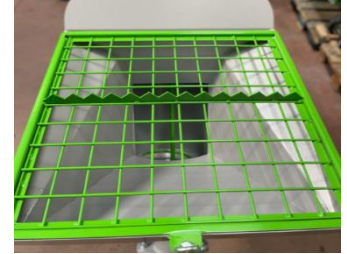

### High efficiency 220V electromotor with 4,3 kW power, gearbox

- A wide variety of mortar pumping possibilities with different pump kits depending on the application,
- Conical tube designed for optimum material output and mixture, easy cleaning,
- Abrasion resistant spiral mixer and connection coupling,
- Fully removable pump system for comfortable transportation,

### Long lasting, low maintenance, powerful HP4 is your biggest assistant in hard jobs!

- Openable mixer protection grille that enables work safety, easy cleaning and maintenance,
- Filling up to 2 bags (25kg / piece) which provides less frequent feed,

### A pump with a wide range of applications!

- Versatile compact design that will be your solution partner for your various application needs,
- Automatic water intake, continuous homogeneous mixing and pumping, portable compressor,
- Different color options according to customer demand,

### Simple, user-friendly, low service requirement

- Quality electrical parts carefully selected from world brands,
- Affordable, robust, easily accessible global spare parts supply,
- Remote machine control from the spray gun,

### FREE ATTACHMENTS with HP4 MX

- 1 pcs Air Compressor: Boxer Typ, 250 l/dk, 400 V / 50 Hz
- 1 pcs 25 mm Ø Hose: 15 m length, 40 bar
- 1 pcs Air Hose: 15 mt length 1/2"
- 1 pcs Water Hose: 10 mt
- 1 pcs Spray Gun
- 2 pcs Sponge Balls: Ø 25 mm hoses
- 1 pcs 10 m electrical connection cable, 220V
- 1 set Cleaner, Cleaner Shaft, Utility Knife, Metal Brush, Wrench, Harby, Cylinder and Conical Filter, Ø25 Hose Gasket, GEKA Gasket, Cleaning Trowel

*\*Free attachments are optional and may be differ.*

| TECHNICAL SPECS.                | HP4 Mono Flex                                   |
|---------------------------------|-------------------------------------------------|
| Mixer Volume                    | 45 lt                                           |
| Water Pump                      | 1,11 kW / 10-50 lt/min                          |
| Mortar Pump                     | Worm pump D6 MONO type                          |
| Pumping Capacity (theoretical)* | 6-25 lt/min                                     |
| Pumping Pressure                | 40 bar max.                                     |
| Pumping Distance**              | 25 m horizontal , 10 m vertical                 |
| Pump Drive                      | 4,3 kW, 220V / 5,5 kW, 380V 50 Hz, with gearbox |
| Weight                          | 224 kg                                          |
| Length x Width x Height         | 1470x620x1500mm                                 |
| Filling Height                  | 1000 mm                                         |
| Max. Aggregate Size             | 3 mm                                            |

\* Pump capacity depends on the physical / chemical properties of the material and required application – transfer distance.

\*\*All of the values have been obtained from field applications carried out by our expert technicians. It may vary depending on the person(s) performing the application.
