

HP25 MX

*The Global Solution at the Construction Site
for Premixed and Packed Building Mortars!*

GYPSUM / FINE PLASTERING

- **Exterior Plastering**
(Lime, Lime Cement and Gypsum Insulation Mortars)
- **Interior Plastering**
(Lime Cement, Gypsum Mortars)

Portable, small and powerful 250 lt / min, 50Hz, **Air Compressor**

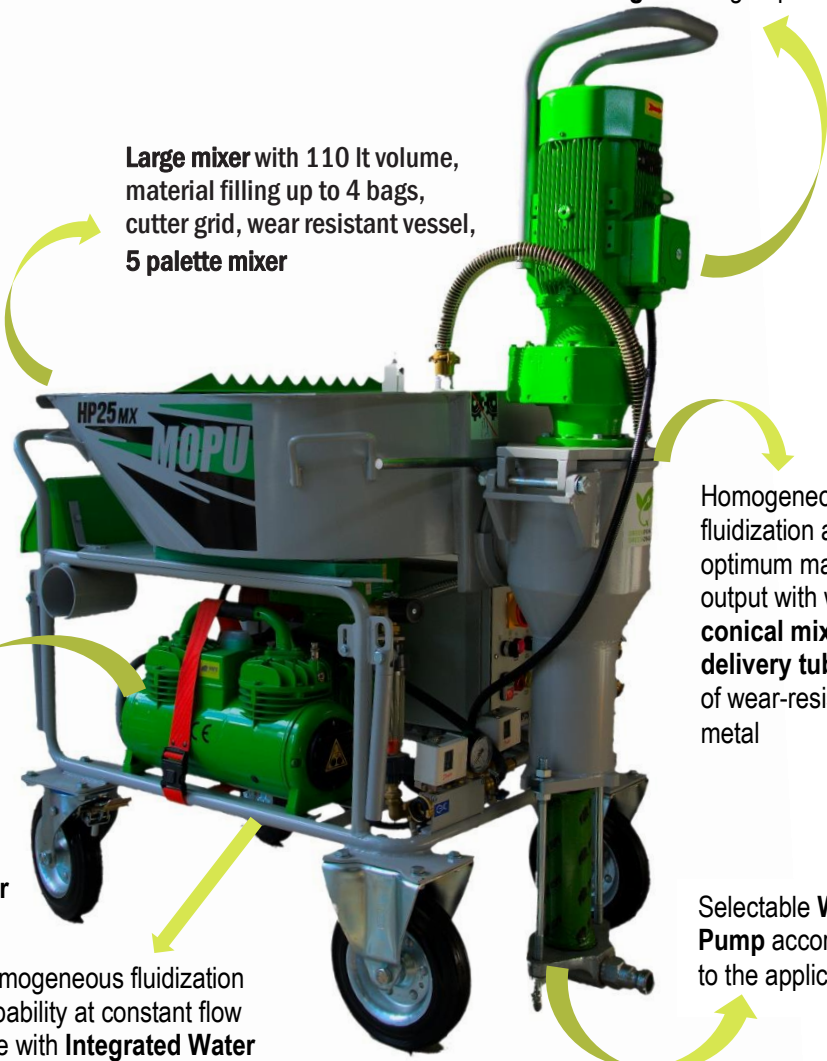

Homogeneous fluidization capability at constant flow rate with **Integrated Water Pump**

Large mixer with 110 lt volume, material filling up to 4 bags, cutter grid, wear resistant vessel, **5 palette mixer**

High efficiency **electric motor - gearbox** group

Homogeneous fluidization and optimum material output with wide, **conical mixing-delivery tube** made of wear-resistant metal

Selectable **Worm Pump** according to the application

**EASY TRANSPORTATION
DISASSEMBLING into 4 PARTS**

MORE APPLICATIONS

- Self Levelling / Liquid Screed
- Fireproofing Mortars
- Water Insulation Mortars
- Wall, Bonding, Restoration Mortars
- Injection and Grouting Mortars
- Fasarite and Decorative Plasters

High efficiency electromotor with 5.5 kW power, gearbox

- A wide variety of mortar pumping possibilities with different pump kits depending on the application,
- Conical tube designed for optimum material output and mixture, easy cleaning,
- Abrasion resistant spiral mixer and connection coupling,
- Fully removable pump system for comfortable transportation,

Long lasting, low maintenance, powerful HP25 is your biggest assistant in hard jobs!

- Openable front protection grille that enables work safety, easy cleaning and maintenance,
- Star mixer (110lt) with mixing pallet position design for optimal mixing,
- Filling up to 4 bags (25kg / piece) which provides less frequent feed,

A pump with a wide range of applications!

- Versatile compact design that will be your solution partner for your various application needs,
- Easy transportation advantage that can be divided into 4 basic components,
- Automatic water intake, continuous homogeneous mixing and pumping, portable compressor,
- Different color options according to customer demand,

Simple, user-friendly, low service requirement

- Quality electrical parts carefully selected from world brands,
- Affordable, robust, easily accessible global spare parts supply,
- Remote machine control from the spray gun,

FREE ATTACHMENTS with HP25 MX

- 1 pcs Air Compressor: Boxer Typ, 250 l/dk, 400 V / 50 Hz
- 1 pcs 25 mm Ø Hose: 15 m length, 40 bar
- 1 pcs Air Hose: 15 mt length ½"
- 1 pcs Water Hose: 10 mt
- 1 pcs Spray Gun
- 2 pcs Sponge Balls: Ø 25 mm hoses
- 1 pcs 25 m electrical connection cable
- 1 set Cleaner, Cleaner Shaft, Utility knife, Metal Brush, Wrench, Harby, Cylinder and Conic Filter, Ø25 Hose Gasket, GEKA Gasket, Cleaning Trowel, Working Sweatshirt

**Free attachments are optional and may be differ.*

TECHNICAL SPECS.	HP25 MX
Mixer Volume	110 lt
Water Pump	1,11 kW / 10-50 lt/min
Mortar Pump	Worm pump D6 type
Pumping Capacity (theoretical)*	25 lt/min
Pumping Pressure	40 bar
Pumping Distance**	45 m horizontal , 15 m vertical
Pump Drive	5,5 kW, 400 V / 50 Hz, with gearbox
Mixer Drive	1,1 kW – 23 rpm
Weight	245 kg
Length x Width x Height	1324 × 728 × 1443 mm
Filling Height	984 mm
Max. Aggregate Size	4 mm

* Pump capacity depends on the physical / chemical properties of the material and required application – transfer distance.

**All of the values have been obtained from field applications carried out by our expert technicians. It may vary depending on the person (s) performing the application.
